Plagiarism Training Requirement: All students in the COPH must adhere to the highest standards of professional and ethical conduct. Among these standards is the recognition that student written work must be original and appropriately cited. In order to facilitate understanding of this standard, all students must complete the on-line course “How to Recognize Plagiarism: Tutorials” at <https://plagiarism.iu.edu/tutorials/> and complete the Certification Test at <https://plagiarism.iu.edu/certificationTests/index.html>. Upon successful completion of the test, students must provide a copy of the Validation Certificate to the COPH Office of Student and Alumni Affairs at cophoffice@uams.edu. The requirement must be completed by the first day of classes. Requirement approval date: 09.02.2020.

Writing Milestone Requirement: All students who enter the College of Public Health are required to complete a Writing Skills Assessment at the beginning of their first semester. The Assessment will identify strengths and weaknesses and highlight opportunities for improvement. Students who do not meet a predetermined score will be required to complete an online COPH 5000 Public Health Writing Workshop course. This course will address the fundamentals of good writing, writing with scholarly sources, revision strategies, and other topics in the interest of improving student writing skills. This is a non-credit curriculum requirement. Requirement approval date: 09.02.2020.

Quantitative Reasoning (QR) Requirement: Effective Fall 2022, all MPH students who enter the College of Public Health are required to complete a QR Skills Assessment at the beginning of their first semester. The QR Assessment will identify strengths and weaknesses and highlight opportunities for improvement. Students who do not meet a predetermined score will be required to complete an online COPH 5001 Public Health QR Workshop course. This course will address the fundamentals of pre-algebra, algebra, and other topics in the interest of improving student QR skills. This is a non-credit curriculum requirement. Requirement approval date: 02.02.2022.

IPE Curriculum Requirement: All COPH degree-seeking students are required to complete the UAMS Quadruple

Aim Interprofessional Education (IPE) Program prior to graduation. According to the World Health Organization (WHO), “*Interprofessional Education occurs when two or more professions learn with, from and about each other to improve collaboration and the quality of care.*” The IPE Program is noncredit hour earning and consists of several workshops and other activities. All aspects of the IPE Program must be completed prior to degree program completion as a condition of graduation. For more information on IPE, please consult the Office of Student and Alumni Affairs, the Associate Dean for Student and Alumni Affairs or visit our website: <https://secure.uams.edu/cophstudent/student-handbook.aspx#ipe>. Requirement approval date: 2015.

MPH Concentration: Health Behavior and Health Education

Competency	Course	Assessment
1. Demonstrate how to apply major health behavior and health education theories that are utilized in public health practice.	HBHE 5225 Theories of Health Behavior and Health Education	Midterm Exam. The examination tests the ability of the students to identify and define the main constructs of major health behavior and health education theories. The exam includes multiple-choice questions, short-answer questions, and essay questions where students are asked to apply the constructs of health behavior and health education theories to common public health concerns. The exam is graded using a rubric that is distributed electronically prior to the exam.
2. Apply major health behavior and health education theories to the design of culturally appropriate health promotion and disease prevention strategies.	HBHE 5225 Theories of Health Behavior and Health Education	Theory Application Project. In this project, students work with local public health practitioners to design culturally appropriate health promotion and disease prevention strategies, applying health behavior and health education theories. The project is divided into two parts: 1) Evidence Table; students must use the scientific evidence to support their selection of a major health behavior and health education theory to guide the design of culturally-appropriate health promotion and disease prevention strategies; 2) white paper; students must write a 5-9 page white paper that details the background and significance of the problem to be addressed, overview of the chosen theory, and health promotion and disease prevention strategies developed based on the theory constructs. Each section of the project is graded using a rubric included in the course syllabus.
3. Debate the effect of cultural competence on qualitative and quantitative approaches used in the study of health disparities.	HBHE 5105 Introduction to Research Methods in Public Health	Debate. Students are divided into two groups to debate whether qualitative or quantitative approaches tend to be more affected by cultural competency in the study of health disparities. Each student will be graded individually for one's performance and also as a team member. The grading method is described in the syllabus.
4. Evaluate evidence-based information for behavioral/educational policies/programs.	HBHE 5105 Introduction to Research Methods in Public Health	Presentation. A slide presentation of a mixed-methods research proposal on a self-selected public health policy/program of concern. The presentation has to show how the student selects, generates, applies, and evaluates evidence-based information for behavioral/educational policies/programs. The grading method is described in the syllabus.
5. Decide the components and process of designing an appropriate program evaluation for a public health problem.	COPH 5421 Rural and Global Health Evaluation and Impact Assessment	Final Exam. The exam will test the student's ability to design an appropriate program evaluation for a public health problem. It consists of short essay questions based on the readings and lectures presented during the course. In answering the questions, students will demonstrate their knowledge of the necessary program evaluation design concepts. The grading method is described in the syllabus.
