Tax id number for your organization. 99-9999999

Provide a brief description of the mission of your organization.

The Coalition to Eliminate COVID-19 was founded in 2020 and its mission is to increase education, outreach, and trust with residents in three counties in the Delta region. Our goals are to work with community organizations, businesses, health care organizations, and local officials to assure that all residents are aware of the vaccines, screening and treatment resources, and that all residents have access to vaccine, screening, and treatment resources.

The target communities are Blacks/African Americans, Hispanics/Latinos, Pacific Islanders, and rural populations. Which of these populations will your target and what is your track-record of working with that specific population group that you will target? Please provide detailed information on programs, outreach, and service you have done with that target community.

Our education and outreach program will target Blacks/African Americans and rural residents who live in Lee, Phillips, and Monroe counties. Since the pandemic began in March of 2020, we have done monthly educational programs on the radio to reach out to these communities and worked with church leaders to integrate screening and vaccination clinics into the church announcements. We have worked with 3 radio stations (92.3, 95.3, 102.1) for the past year to host monthly speakers who have expertise on COVID-19 and who have concerns about COVID-19. Our speakers have taken questions from radio listeners to provide accurate and trustworthy information based on what was known at the time. We have provided regular and ongoing information to church leadership about the location, times, and other details about free vaccination clinics and free screening and testing. We have provided language and write-ups that can be posted on church websites, stated orally during services, and provided on flyers as well.

Describe in detail how the funds will be used to target that community. What is your goal and what do you expect to achieve by the end of your activity?

Our organization will host screening, testing and vaccination days at local schools in Phillips county. Because children aged 12 and over are eligible to get the vaccine, we will begin with middle and high schools. We already have a relationship with the school system and will work with the department of health to schedule a clinic once per week at a different school. We will work with school officials to send notices home to parents so that parents can attend the clinic with their child after school. During these events, we will provide personal protective toolkits for a family of 5, music, refreshments, free home test kits for COVID-19, and a speaker.

We have 3 goals: 1) increase the number of eligible children, parents, and other family members in these counties who are completely vaccinated, 2) increase the number of people who screen and test for COVID-19, and 3) increase awareness of the need to continue to use masks, disinfect, wash hands, and physically distance. We will measure and report these outcomes back to the coalition. We hope to have all children and parents who attend middle and high schools in these counties fully vaccinated.

How to Complete the CEALFund Coalition Application

- Submitting your budget
- The application and budget portion of the application are submitted separately.
- Please download the budget form **before** you press the Submit button. If you forget to do so, the budget form is located on the website and you can submit it to btaylor@uams.edu
